Subject: Bug Release 3.7.4 Release Notes

Dear Mover's Suite User,

The following briefly describes the issues fixed on top of Version 3.7 of Mover's Suite Software. The **3.7.4** bug release **WILL BE A FULL VERSION RELEASE** since it includes changes that impact the client server, database structure, and external interface processes.

Issue Description	Reference	Subjects
Items addressed in patch Shavano_24032_Patch and are described within Technical Update (2274, 2284, 2285) .	2274, 2284, 2285	Invoicing, Payment Management
Users on Windows 2000 were experiencing access violations after switching between Order Information and Revenue Entry. <u>This is an issue for Windows 2000 clients only.</u> A problem with the Country Code associated to phone numbers on the Agents tab was also identified and corrected with this fix.	2320	General application
Vendor Summary on commission statements were not sorting correctly on Order Number.	2324	Commission Statements, Reporting
Auto commissions were not working on imported items.	2289	Revenue Entry, Statement Import
Branch and van line images were not displaying on storage invoices generated through Recurring Billing Management.	2277	Invoicing, Reporting, Recurring Billing
Weight values were not being set correctly on split hauls based on miles.	2275	UniGroup Interface
Users unable to modify the Other Surveyor field (which appears on Agents tab when the Origin Agent is not a sister agency)	2269	General application

Contact your professional support representative for more information on these issues and to schedule an upgrade.

Thank you,

Joe Eckert
